

OUR PURPOSE

WE SOLVE our customer's most challenging problems by delivering innovative & critical solutions.

WE SUPPORT the Aerospace & Defense community's mission with critical technology enhancing the safety and security of our Nation and our Allies.

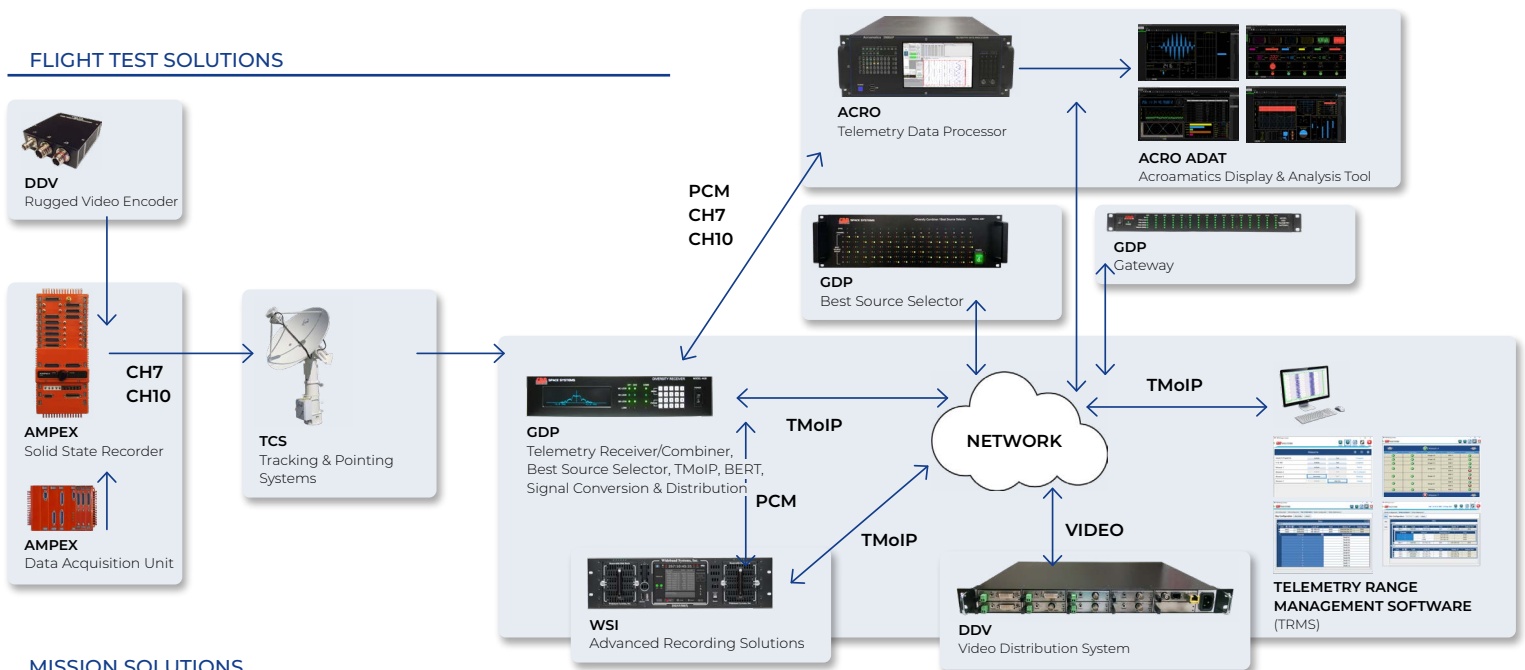

WE PROVIDE best-in-class products, exceptionally responsive support and the lowest risk solutions.

END-TO-END (E2E) SOLUTIONS

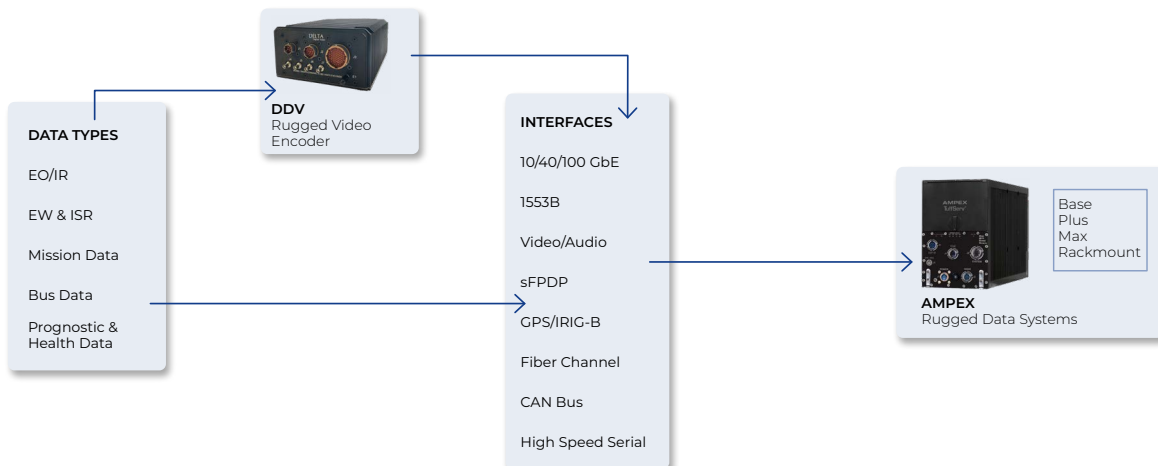

Our E2E Solutions reduce your project risk by deploying pre-tested and pre-integrated components to meet your system requirements. These solutions eliminate vendor to vendor finger pointing and provide a single point for support and service coordination. Delta is your trusted partner for telemetry & mission success.

MISSION SOLUTIONS

OUR MARKETS

TELEMETRY SYSTEMS

Delta Telemetry Systems (DTS) is an industry-leading supplier of high-quality aerospace telemetry products for Flight Test, Missile Test, Range Safety, Launch Support and Satellite Command and Control applications. Our product offerings address the complete telemetry chain from Antenna, Data Acquisition, Storage, Transport and Distribution to Telemetry Processing and Display.

DTS customers include all DoD entities, all Major Primes, Integrators, Gov Labs, Aircraft & Missile Manufacturers, & Launch Facilities.

We have led the telemetry community for over 50 years bringing a wealth of technical and application knowledge to our customers.

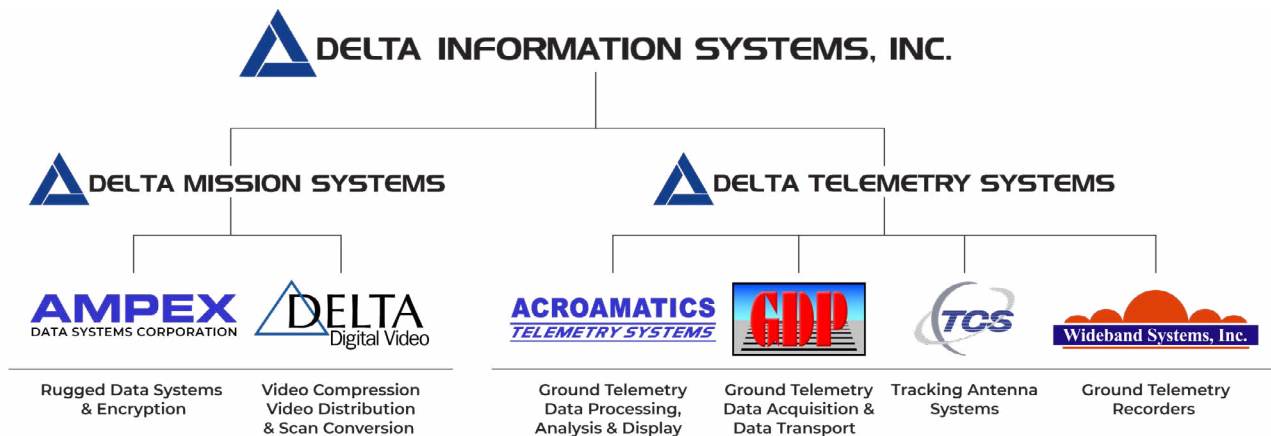

MISSION SYSTEMS

Delta Mission Systems (DMS) provides rugged data acquisition and video encoding solutions for any edge application in any domain in defense of our nation and beyond.

DMS combines the expertise of Ampex and Delta Digital Video to offer solutions that capture, process, store, host, and secure high-value data while offering reliable encoding, transmitting, and decoding of diverse video formats.

We are committed to delivering cutting-edge technology and unparalleled support to our customers, enabling them to achieve their mission objectives with confidence and efficiency. Our hardware is SWaP-C optimized and can operate in ground, maritime, air, and space domains.
