

Wideband Telemetry Recorder

MODEL DRS8000P DISKBANK

KEY FEATURES

Two Disk Striped Array

Removable Media

Solid State Drives (SSD)

Capacity up to 8TB

Disk capacities are selectable from 500GB, 1TB, and 2TB

Small Form Factor

FIPS-140, AES-256 Encryption

GENERAL DESCRIPTION

The DRS8000P-DISKBANK is a removable media device used with the DRS8000P Recorder. The unit is linked to the system via a SAS interface to create the necessary bandwidth required for high-speed data recording applications.

The disk bank is configured with SATA SSD. With two disk banks per system, the user has configuration options such as mirror mode for two redundant, two disk volumes, or as a 4 disk, striped volume.

The disks are packaged on a machined aluminum tray. Optimized for the Telemetry market, the DRS8000P-DISKBANK provides exceptional bandwidth and scalability to the recorder.

PART NUMBERS AVAILABLE

DRS-8000P-DISKBANK-1TB/SSD (500GB SSD)

DRS-8000P-DISKBANK-2TB/SSD (1TB SSD)

DRS-8000P-DISKBANK-4TB/SSD (2TB SSD)
